

QP No. QP-ELE-005	Issue Date 15-09-2026	Revision No. R02	Date 15-09-2026	Name SPECguard TEST	COSO
Electrical Installation Inspection Procedure					

DOCUMENT CONTROL AND PURPOSE

This procedure defines the requirements for controlled inspection, verification, recording, and reporting of the applicable engineering activity.

TABLE OF CONTENTS

1. Purpose	1
2. Scope	2
3. Electrical Requirements	3
4. Inspection Procedure	4
5. Testing Requirements	5
6. Acceptance Criteria	6
7. Records and Reporting	7

Document status: Controlled test document for SpecGuard inspection benchmarking.

QP No. QP-ELE-005	Issue Date 15-09-2026	Revision No. R02	Date 15-09-2026	Name SPECguard TEST
Electrical Installation Inspection Procedure				

1. Purpose

All inspection activities shall be performed using approved instruments and documented against the current revision of the applicable procedure.

Inspection personnel shall verify identification, condition, measurements, documentation, and acceptance criteria before releasing the item.

Any deviation from the specified requirement shall be recorded as a finding and reviewed according to the applicable quality process.

QP No. QP-ELE-005	Issue Date 15-09-2026	Revision No. R02	Date 15-09-2026	Name SPECguard TEST	COSO
Electrical Installation Inspection Procedure					

2. Scope

All inspection activities shall be performed using approved instruments and documented against the current revision of the applicable procedure.

Inspection personnel shall verify identification, condition, measurements, documentation, and acceptance criteria before releasing the item.

Any deviation from the specified requirement shall be recorded as a finding and reviewed according to the applicable quality process.

Inspection Acceptance Table

Parameter	Requirement	Result
Pressure	10 bar	PASS
Temperature	80 C	PASS
Visual condition	No visible damage	PASS
Documentation	Current revision	PASS

QP No. QP-ELE-005	Issue Date 15-09-2026	Revision No. R02	Date 15-09-2026	Name SPECguard TEST	COSO
Electrical Installation Inspection Procedure					

3. Electrical Requirements

All inspection activities shall be performed using approved instruments and documented against the current revision of the applicable procedure.

Inspection personnel shall verify identification, condition, measurements, documentation, and acceptance criteria before releasing the item.

Any deviation from the specified requirement shall be recorded as a finding and reviewed according to the applicable quality process.

Referenced Figures

- Figure 1 — Inspection Flow
- Figure 2 — Equipment Identification
- Figure 3 — Measurement Arrangement

Operating pressure specified in this section: 15 bar.
